

CASE STUDY

LIQUID MILK PROCESSING (LMP)

INDUSTRY - DAIRY

CUSTOMER - BARODA DAIRY

OBJECTIVE

To Maximise Profits from Machines,
Processes, and Plants.

CHALLENGES

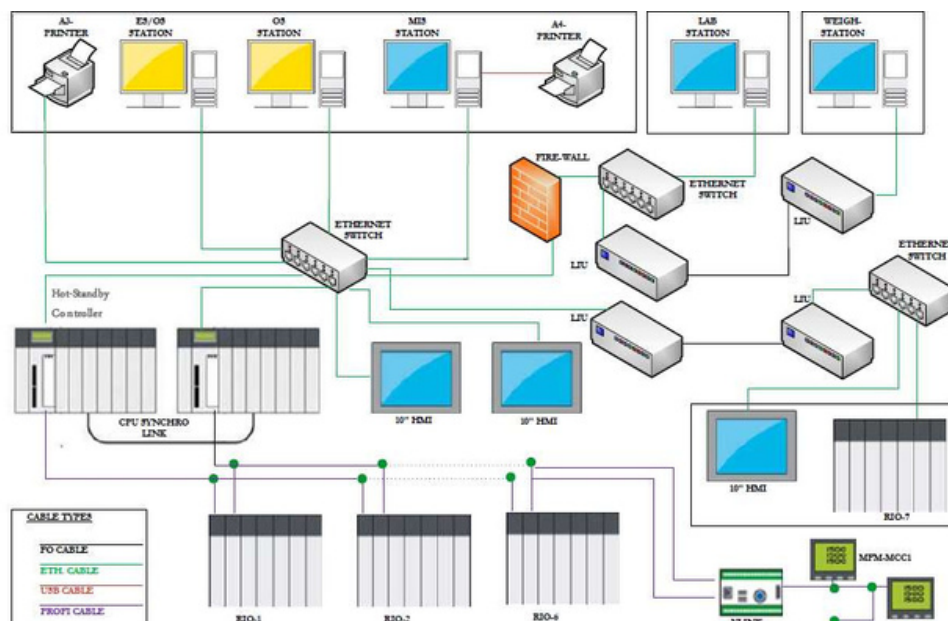

- 1 Automation architecture for LMP plant having a capacity of 90 KL.
- 2 Hot redundancy up to the level of PLC, Power Supply, Network, and IM Module.
- 3 Integrate automation architecture with redundant IM module
- 4 Profibus to optical module for remote communication
- 5 Implementing 64k tags engineering and operators SCADA system for control
- 6 SCADA equipped with redundancy for seamless communication
- 7 Weigh bridge integration with SCADA
- 8 Fail-safe conditions to be integrated in PLC
- 9 Y link implementation for the third party separator PLC and energy meter system

SOLUTION

- 1 Automation architecture for LMP plant having a capacity of 90 KL.
- 2 Hot redundancy up to the level of PLC, Power Supply, Network, and IM Module.
- 3 Integrate automation architecture with redundant IM module
- 4 Profibus to optical module for remote communication
- 5 Profibus to optical module for remote communication
- 6 Profibus to optical module for remote communication

ARCHITECTURE

BENEFITS

- ✓ Automation of good receipts to final packing line
- ✓ Complex processes made simple vide automation
- ✓ Product and Cleaning in Process (CIP) route selection
- ✓ MIS connectivity & 100% CPU to I/O connectivity
- ✓ High speed high accuracy processing
