

Energy Management System (EMS) - BESS

- ✓ EMS compatibility – with leading BESS system
- ✓ Wide integration- Solar-Wind-DG and Grid
- ✓ Feature loaded- V-Q-f control, tariff-based charge/discharge
- ✓ ML Model- Predict Issue, Generate Custom KPIs
- ✓ Integrated Tools- APM, CMS, Performance tracking

Our Solution

Comprehensive energy monitoring system

Central SCADA for distributed plants

Load shedding capabilities

Scalable architecture & advanced communication protocols

Substation automation with SLDC connectivity

Features & Benefits

Seamless SAP integration for data exchange

Centralized energy data compilation

Cost savings through enhanced efficiency

Efficient load analysis & planning

Customizable reporting and dashboards

Real-time switchyard status overview

Improved energy consumption control
